

## Questionnaire:

1. What kind of layout do you want? For example, do you want a clean, simple site? Do you want a unique and funky site that will stand out from all the rest? Do you want the navigation on the top, bottom, left, or right side of the screen?

---

---

2. Is there a logo for the site? Do you want a logo created? What aspects/elements would you like in the logo?

---

---

3. Is there a color scheme? What colors do you like? Do you like blue/white? tan/white? black/white? Just plain white? A color scheme is important in making an appealing site that you want to come back to over and over again. Are there sites out on the Internet that you/they have looked at and really liked because of its layout or colors? If so, why? What was appealing about it?

4. What about other graphics? Are there particular kinds of images you want on the site? Do you want animations?

---

---

5. What new information needs to be added? What needs to be deleted or removed?

---

---

6. What about a domain name? I strongly suggest that you have your own space on the World Wide Web, with your own URL. A professional organization should have a professional address. This requires the purchase of a domain name and server space, which is relatively cheap depending on where you purchase.
